Menu Foods Refines Recall List

TORONTO, ONTARIO--(April 17, 2007) - Menu Foods

Attention Business/Financial Editors

Menu Foods has previously recalled wet cat and dog food produced with adulterated wheat gluten supplied by ChemNutra Inc. Over the past several days, Menu Foods continued a detailed analysis of production records at its Emporia, Kansas, plant as part of the US Food and Drug Administration's ongoing investigation of this adulterated wheat gluten. As a result of this work, Menu Foods advises the public:

- One additional item has been added to the recall list and is shown below
- Two additional production dates of eight varieties of pet food have been added to the recall list. These eight varieties of pet food had previously been withdrawn from the market and should already be off the retailer shelves.

An updated list of the recalled products, including this addition, is available at the Menu Foods website at <http://www.menufoods.com>.

Dog Food

| Brand | Look For This Date On The Bottom of Can or Back of Pouch | Variety Description | Can / Pouch | Size | UPC |
|--------------|---|----------------------------|--------------------|-------------|-------------|
| Natural Life | Nov/22/09 | Vegetarian 13.2oz | Can | 13.2oz | 12344-07114 |
